## Management Methods for Controlling Pollution Caused by Electronic Information Products Regulation

Dear Sir or Madam,

The Chinese Law "Management Methods for Controlling Pollution Caused by Electronic Information Products Regulation" will prohibit the following substances: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE).

We have made great efforts to remove these substances from our products and can tell you now that we manufacture only products which comply with the Chinese Law "Management Methods for Controlling Pollution Caused by Electronic Information Products Regulation" as well as with the European Directive 2002/95/EG RoHS.

This information substitutes a special labeling of our products.

Best regards

Michael Unger  
Executive Vice President  
Engineering and Manufacturing

Dr. Wolfgang Hauger  
Vice President  
Quality Manager
